## Terrace awning

The Twins, originally an awning aimed at the commercial market. However, this does not mean that this is its sole purpose. This free standing terrace awningsun protection system can also be placed at your home.

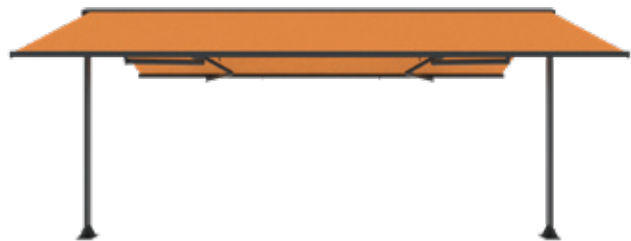

Regardless the awning is open or closes, the free passage under the awning is never obstructed due to the posts. They are are placed as ergonomically as possible to prevent costly space loss.

The Twins can be placed close to one another so that you can create a larger surface with shelter and shade. In addition, it is possible to outfit the awning with a volant. The Twins is available in RAL 9010 (pure white), but can be finished in almost any RAL-color on request.

### Characteristics

- Heat and light-resistant
- Installable as a freestanding unit
- Unobstructed passage beneath the awning
- Installable side by side for additional shading surface
